LEVELS AND METHODOLOGY

The basis of our methodology is communication. Our objective is that the student will be able to use the new knowledge in the correct way. In view of this, as well as studying grammatical structures and linguistics, we stress the necessity of achieving communicative competence.

To reach these objectives the Centre has developed a methodology based on the functional use of the language and by the end of the course the student will have learnt, not only about the culture, but also about the social life offered in Spain.

It is important and logical that the student takes the responsibility of learning seriously, through studying, timing and continuity.

At the same time we are aware of the various Spanish dialects and languages (Spanish in South America)

OUR METHODS

Our methods for teaching Spanish to foreigners are structured for various levels depending on the requirements of the European Mark and the curriculum of The Cervantes Institute.

Our objective is to give students the strategies and necessary know-how to cope in a Spanish environment by being able to communicate.
